Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-3, 5, and 8-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wegener in view of Jansson.

The device and method as claimed is substantially disclosed by Wegener with a tool holding means 39, a leg 32 pivotally connected about a leg pivot axis 35 to the tool holding means and the leg having as pivot point 33 at an end remote from the tool holding means, a pivot support 14 for location adjacent to the grinding apparatus 12 and having a pivot receiver 33 adapted to receive the pivot point, and the pivot support is adjustable 19 so that the position of the pivot receiver may be adjusted relative to the grinding wheel to make the leg pivotal axis either further or closer to the grinding wheel than the pivot receiver as desired, but lacks the tool holding means being a tool clamp with a clamping block which is movable relative to two intersecting walls to fixedly hold the tool in place.

Jansson teaches using a tool clamp with a clamping block 13 which is movable relative to two intersecting walls 10 to fixedly hold the tool 1 in place. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to use a tool clamp

in Wegener as taught by Jansson with a clamping block 13 which is movable relative to two intersecting walls 10 to fixedly hold the tool 1 in place during the grinding of the tool.

Allowable Subject Matter

3. Claims 4, 6, and 7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
